PROFESSIONAL SUMMARY

Entry-level Full Stack Developer with a Computer Science background and hands-on experience in developing responsive web applications and backend systems. Eager to contribute technical skills and problem-solving abilities to build scalable applications and support organizational growth.

WORK EXPERIENCE

Vhilv Technology Private Limited | MAY 2025 - FEB 2026

Full Stack Developer

- Developed responsive web pages using HTML, CSS, and JavaScript to create user-friendly and interactive interfaces.
- Built and integrated backend functionality using Python, enabling smooth data processing and server-side operations.
- Implemented dynamic features, debugging, and performance optimization to improve application functionality and user experience.

PROJECTS

Fleet Management System

- Designed and developed a Fleet Management System integrating hardware devices and software automation to track vehicles, monitor data, and manage fleet operations efficiently.
- Implemented end-to-end automation using Python, HTML, CSS, and JavaScript, connecting hardware inputs with the web application for real-time monitoring and management.

Arifa Innovation & Incubation Council Website

- Developed a responsive full-stack website for Arifa Innovation & Incubation Council, featuring a user-friendly platform and an integrated admin panel that allows administrators to dynamically manage and update all frontend content without modifying the source code.

Green Growth Landscaping

- Developed a responsive full-stack website for Green Growth Landscaping with an integrated admin management system that allows administrators to manage and update all website content dynamically, ensuring smooth operation without modifying the source code.

CERTIFICATES & COURSES

- **Fullstack With Python** (Pentagon space), Bangalore
- **Web Development** (Let's Game Tech), Coimbatore
- **Fullstack With Python** (Guvi)
- **Fullstack Development** (LinkedIn Learning)

TECHNICAL SKILLS

- Python
- HTML
- Flask
- Project Developing
- SQL
- CSS
- Prototyping
- IOT Integration
